

Fluoride Facts

Fact 1: The hydrofluorosilicic acid added to Lethbridge water is a toxic by-product scrubbed from the smokestacks of the fertilizer industry.

Fact 2: Fluoride is more toxic than lead. Is lead beneficial in any dosage?

Fact 3: Fluoride is a drug added to our water with total disregard for individual dosage.

Fact 4: No drug should be administered without informed consent. Why is fluoride an exception?

Fact 5: Fluoride prevents less than one cavity per lifetime, at best. Meanwhile, it causes skeletal fluorosis, arthritis, reduced IQ, impaired thyroid function, and possibly bone cancer.
