

# Your Child and Fluoride

**Fact:** Fluoride at levels used in the Lethbridge water supply lowers IQ.

**Fact:** Fluoride damages teeth and bones, causing dental and skeletal fluorosis, fractures, arthritis, and osteosarcoma (bone cancer).

**Fact:** Fluoride is linked to thyroid imbalance and calcification of the pineal gland. These glands govern important body processes.

**Fact:** Fluoride leaches lead from pipes, causing blood lead levels to be significantly higher in children living in fluoridated communities.
