

Does this make sense to you?

=

Pea-sized dab of toothpaste

One glass of **Lethbridge water**

0.25mg of fluoride

0.25mg of fluoride

If swallowed, the American Dental Association recommends you contact **The Poison Control Center.**

Health Canada says there is **NO RISK** associated with drinking **8 -10 glasses, 8 - 10 X as much!**

Time to STOP this NONSENSE!
